

We are looking for volunteers for a study using an investigational device.

Participants will be asked to spend approximately 30-45 minutes for the collection of vital signs, focusing on blood pressure. Participants will also have their height and weight measured.

In order to participate in this study, you must:

- Be age 18 and over
- Be able to use your LEFT Hand to hold the device to your forehead
- NOT have any condition that prevents the staff from collecting blood pressure in the left or right arm

Why Participate? Participants will be introduced to a new noninvasive device in development, the Scanadu Scout™, to measure vital signs, including blood pressure.

Subjects will be compensated with a \$25 gift card.
